

Extreme Production

Coupled with solid type and long productive life!

"Julie Too" photo by Lea McCullough, Cybil Fisher Photography; "Jelly" photo by Billy Heath

The "Jayne" cow family is the most prolific family in our herd, with multiple generations in the milking string and plenty of replacements in the heifer pens. Characteristic traits of the family—extreme production, long productive life and solid functional type—make these some of our favorite animals to work with. Many have lifetime credits in excess of 100,000M.
